

Virtual Higher Physics

Virtual Higher Physics is a computer based, interactive textbook, which includes animations, example problems, interactive summaries and much more.

The software has been developed to follow the Higher Physics (CfE version) syllabus closely and can be used in a variety of ways to support students' learning. It is a particularly powerful resource for consolidation of concepts developed during normal classes. It can also be used as a stand alone resource by students who have missed class work, or who require additional study on a particular topic.

Teachers will also find the animations particularly useful during normal direct teaching.

Virtual Higher Physics is presented in topics corresponding to the topics described in the content tables of the SQA arrangements document.

Purchase of this CD entitles the user to install the software on computers within the purchasing institution. The software may also be installed and run on a local network. Schools purchasing the software may also order online subscriptions to allow their students to use the material at home.

Installation:

Insert the CD into the CD drive and double click on **My Computer**.

Double click on the CD drive (the CD is labeled **Vir H Phy**).

Click the folder **Virtual Higher Physics** and drag it to your desktop. This will create a folder on your desktop.

To run Virtual Higher Physics, simply open this new folder and double click on the icon labeled Virtual Higher Physics.exe. The software can also be run in your browser by clicking the icon labeled VHP Browser version.html.

A version of the software is supplied for Apple users.

Virtual Higher Physics can be run from the CD, without installation on your hard drive.
